

Airl serves me as a resident of the local community by providing positive listening that can only be found on this radio station.

The effect on the local community if Airl were to be displaced by an LPFM broadcaster providing other programming would be that all people that presently enjoy this station would be at a loss of both positive listening pleasure and also we would lose the positive spirit building input that the world no longer gives care to. Without God's Word going out, we as a people and a nation would lose the only ground that is firm enough to continue building this country on. I believe that the service provided by Airl is in the public interest because without the positive influence it provides, we are left with only the dismal onslaught of negative feeding that is both self defeating as well as depressing , leaving no hope or will to seek hope.

God is and will always be our only hope for staying what we as a people have become from our fore-fathers...and that is a country that is made to have the freedom to worship God as we so choose. Without Christian radio, we remove our choices from both ourselves and our children.

Please do not allow this to happen. Thankyou and have a nice day!
